I am ready to start. Should I move my project to production?

Yes. When you are ready to collect real data, you should move your project FROM Development status TO Production status.

Once you move to production status, you will no longer be able to edit the fields in real-time. Critical changes will undergo a review by a REDCap Administrator to help prevent accidental data loss. Therefore, it is highly recommended that you, and other end-users, test your project by entering practice data.
